I. Materials

Development.

Language teaching
has five important
components:

students, teachers,
materials, teaching
methods and

evaluation. Nuna

n(1992) states that

teaching materials are

Online Library Materials

often the most substantial and observable component of pedagogy. In addition, Cunnings (Richards, 2003) summarized the role of materials (particularly textbook) in language teaching as a resource - for presentation materials; activities for learners practice and

Abstract. This article
reviews the literature
on the relatively new
field of materials

development for
language learning and
teaching. It reports
the origins and
development of the
field and then reviews
the literature on the
evaluation,
adaptation, production
and exploitation of
learning materials. It
also reviews the
literature, first, on a
number of

controversial issues in
the field, next, on
electronic delivery of
materials and, third,
on research in
materials
development.
