This JDBC tutorial book is a collection of notes and sample codes written by the author while he was learning JDBC technology himself. Topics include introduction to JDBC driver; installing JDK on Windows and other systems; Using Derby (Java DB) JDBC Driver; Using MySQL JDBC Driver (MySQL Connector/J); Using Oracle JDBC Driver; Using SQL Server JDBC Driver; Using JDBC-ODBC Bridge Driver. Updated in 2020 (Version 3.10) with JDBC 4.3.

This book is a collection of tutorial notes and sample codes written by the author while he was learning JDK (Java Development Kit) core libraries himself. Topics include Time and Calendar, Internationalization, Unnamed Packages, Collections, Character Set and Encoding, Logging, XML related technologies: DOM, SAX, DTD, XSD, and XSL, Cryptography, Certificates, Key stores, Cipher and Encryption, Socket communication, SSL and HTTPS. Updated in 2020 (Version 6.21) with macOS and CentOS tutorials.

Fundamentals of Tests and Measures for the Physical Therapist Assistant provides students with the tools required to interpret the physical therapy evaluation and replicate the measurements and tests. This text guides students in learning how to utilize case information and documentation furnished by the PT to assist in the follow-up treatment.

This tutorial book is a collection of notes and sample codes written by the author while he was learning Java Swing and AWT himself. Topics include Swing and AWT (Abstract Windows Toolkit) class library; graphical components: JButton, JCheckbox, JComboBox, JFrame, JLabel, JMenu, JRadioButton, JTextField; frame layouts; menus; dialog boxes; editor pane; Unicode and Chinese. Updated in 2020 (Version 4.30) with JDK 15. For latest updates and free sample chapters, visit <http://www.herongyang.com/Swing>.

Because health care institutions produce massive quantities of records, and because these institutions have complex interconnections with other organizations, they now need to take an active approach to selecting documentation for historical preservation. This book provides the background information necessary for archivists who deal with health care systems records to devise appropriate procedures, including a systematic method for devising institutional documentation plans (strategic plans that specify which materials should be preserved). Volume editor Joan Krizack begins by offering a general overview of the U.S. health care system and of the different settings in which care is delivered. Contributing authors then discuss the salient characteristics for archivists of health agencies and foundations; biomedical research facilities; educational institutions; professional and voluntary associations; and health industries. In the final chapter, Krizack explains how to develop and carry out a documentation plan, describing the implementation of one such plan at Children's Hospital in Boston.

This tutorial book is a collection of notes and sample codes written by the author while he was learning Java himself. Topics covered in the book include: Java language basics; execution environment; generic classes and parameterized type; generic methods and type argument inferences; enum types and constants; lambda expressions; annotation types and invocations; Java modules; execution threads and synchronization; memory management and garbage collection. Updated in 2020 (Version Version 8.20) with JDK 13 tutorials.

Focuses on the communication skills that are the key to good documentation.

Over 100 million workers are protected through the Dept. of Labor's enforcement of labor laws. The Wage and Hour Div. (WHD) enforces provisions that ensure workers are paid at least the fed. minimum wage and for overtime. According to the Dept. of Labor, investigations range from comprehensive investigations to conciliations, which consist primarily of phone calls to a complainant's employer. This testimony highlights findings from an ongoing investigation of WHD's process for investigating and resolving wage and hour complaints. This testimony will report on cases that have been identified that shows inadequate WHD investigations of complaints. Illustrations.

Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. Feeling unsure about the ins and outs of charting? Grasp the essential basics, with the irreplaceable Nursing Documentation Made Incredibly Easy!®, 5th Edition. Packed with colorful images and clear-as-day guidance, this friendly reference guides you through meeting documentation requirements, working with electronic medical records systems, complying with legal requirements, following care planning guidelines, and more. Whether you are a nursing student or a new or experienced nurse, this on-the-spot study and clinical guide is your ticket to ensuring your charting is timely, accurate, and watertight. Let the experts walk you through up-to-date best practices for nursing documentation, with: NEW and updated, fully illustrated content in quick-read, bulleted format NEW discussion of the necessary documentation process outside of charting—informed consent, advanced directives, medication

reconciliation Easy-to-retain guidance on using the electronic medical records / electronic health records (EMR/EHR) documentation systems, and required charting and documentation practices Easy-to-read, easy-to-remember content that provides helpful charting examples demonstrating what to document in different patient situations, while addressing the different styles of charting Outlines the Do's and Don'ts of charting – a common sense approach that addresses a wide range of topics, including: Documentation and the nursing process—assessment, nursing diagnosis, planning care/outcomes, implementation, evaluation Documenting the patient's health history and physical examination The Joint Commission standards for assessment Patient rights and safety Care plan guidelines Enhancing documentation Avoiding legal problems Documenting procedures Documentation practices in a variety of settings—acute care, home healthcare, and long-term care Documenting special situations—release of patient information after death, nonreleasable information, searching for contraband, documenting inappropriate behavior Special features include: Just the facts – a quick summary of each chapter's content Advice from the experts – seasoned input on vital charting skills, such as interviewing the patient, writing outcome standards, creating top-notch care plans “Nurse Joy” and “Jake” – expert insights on the nursing process and problem-solving That's a wrap! – a review of the topics covered in that chapter About the Clinical Editor Kate Stout, RN, MSN, is a Post Anesthesia Care Staff Nurse at Doshier Memorial Hospital in Southport, North Carolina.

This interactive book gives the student a tool with which to practice current knowledge of the patients process by walking the student through 150 trauma and medical case studies , most of which are based on real cases.
