The kidney was placed into the dissection tray and examined thoroughly prior to dissection. Identification of the ureter and blood vessels was performed. A knife was used to make a coronal cut of the kidney in order to examine the interior structures.

Photographs were taken as structures were identified. The sheep kidney is very similar to a human kidney.

YOUR GUIDE TO DISSECTION - Philip Harris

This is a plain preserved specimen. Dissect the kidney of an adult sheep to discover the location and/or look of parts of the kidney, such as the renal artery, the renal pelvis, the ureter, the renal cortex, and more. Due to limited availability of sheep kidneys, we may occasionally substitute pig kidneys. Pig kidneys are slightly larger, just as easy to
